Chassis & Power Supplies

Power Supplies

- 110, 220 VAC or -48 VDC to 24 VDC module offerings
- 24 VDC redundant powering (AC module - diode steered, DC module - true load share) is easily accommodated by installing two power supplies into an active chassis
- 24V rear terminal block output accommodates remote powering options
- Front LEDs indicate 24V power and power supply status
- Voltage, current, temperature, and fan status parameters are easily monitored over the network (HMS compliant)

D3.1/CCAP™
Compliant

1.2 GHz

(SNMP v2c) or through a web browser; email alarm notification is also supported

- Power supply module takes up two slots in MAXNET® II active chassis (total of 24 slots)
