OVERVIEW

Digicomm's family of DWDM Optical Passives are designed to maximize the capacity of existing fiber optic networks, which greatly reduces the need to construct new fiber optic plant. Available in 4, 8, 16, 20, and 40 channel options, Digicomm's DWDM Optical Passives provide flexibility, along with industry leading specifications. Digicomm's DWDM Optical Passives use the standard ITU channel plan (ITU-T G694.1), support 100GHz channel spacing, and operate between ITU channels 20 and 62. All of Digicomm's Outside Plant (OSP) Optical Passives are cassette-style with SC/APC connectors and come with 1M-long, 0.900mm pigtails. They can be mounted inside a standard Fiber Optic Splice Case. Digicomm's DWDM Optical Passives also include an Expansion Port, providing the ability to scale the network in the future, as well as Test Ports to assist with network troubleshooting.
