BEAD Subgrantee Financing Program

Your equipment payments may be due months before your BEAD reimbursement arrives.

Don't Let BEAD Reimbursement Delays Slow Your Build!

BEAD subgrantees may need to purchase equipment, schedule contractors, and continue construction well before reimbursement is received. State review, documentation requests, and payment processing can create total cash-flow exposure of **90–150 days**.

Extended Payment Terms Up to Net 150

Program options include:

- Payment terms aligned with anticipated reimbursement milestones.
- Complete, staggered, or site-kitted equipment deliveries.
- Financing for your complete BEAD product ecosystem—from fixed wireless and fiber to power, infrastructure, networking, and installation accessories.
- Procurement and equipment-documentation support for BABA compliance and reimbursement submissions.

Ready to Bridge Your BEAD Cash-Flow Gap?

understands BEAD project milestones, equipment requirements, staged deployments, compliance documentation, and state reimbursement processes.

Keep Your Project Moving

With flexible financing, staged logistics, broadband program expertise, and 32 years of industry experience, Digicomm can help you:

PRESERVE

working capital for labor, matching contributions, permitting, and construction

SECURE

your fixed wireless and fiber equipment to reduce supply-chain risk, prevent deployment delays, and keep your project on schedule.

ALIGN

equipment deliveries with project milestones and construction schedules to keep crews productive and deployments moving.

Program participation is subject to credit approval, project review, and execution of final financing terms. BEAD milestones, eligible costs, documentation requirements, and reimbursement timelines vary by state and subgrant agreement. Digicomm does not guarantee cost eligibility, milestone approval, reimbursement, or payment timing.
